

MAMMOTH

Mammoth Distilling Artisanal Hand Sanitizer

Mammoth's high-quality hand sanitizer is a topical solution which is 80% alcohol antiseptic and made in Traverse City Michigan. It is a liquid product (*not a gel*) that can be sprayed on your hands or used on surfaces as an effective alcohol-based hand rub (ABHR).

Our formula adheres to CDC and WHO guidelines and it inactivates **SARS-CoV-2 (Covid-19)** and reduces the number of pathogens that are present on the hands or treated surfaces. We are producing large quantities to do our best to support the efforts of large and small companies trying to re-open businesses in a safe, clean environment.
